

# Power Macintosh 9500 Series

## Features

### High performance

- 150-MHz PowerPC 604 processor, user-upgradable to faster processor when available (up to 200 MHz)
- Built-in floating-point processor and 32K cache
- 512K level 2 cache

### Communications and multimedia

- Two high-speed serial ports compatible with GeoPort and LocalTalk cables
- Quadruple-speed CD-ROM drive
- 16-bit stereo audio input and output
- Support for speech-recognition and text-to-speech capabilities

### Expandability

- 16MB or 32MB of RAM expandable to 768MB
- 2MB of VRAM expandable to 4MB
- Six industry-standard PCI expansion slots
- Dual-channel SCSI connector for hard disks, CD-ROM drives, and other SCSI devices
- Two open internal expansion bays for additional hard disk drives or other SCSI devices

### Compatibility

- Includes 10BASE-T and AAUI Ethernet connectors
- Supports Open Transport networking software (TCP/IP and AppleTalk)
- Runs 680x0 Macintosh applications as well as applications accelerated for Power Macintosh computers
- Reads Mac OS, Windows, MS-DOS, OS/2, and ProDOS floppy disk formats
- Runs MS-DOS and Windows applications via optional PC Compatibility Cards
- Comes with all of the software required for Internet access

### System 7.5 software

- Makes working with different applications consistent, so they're easier to learn and use
- Allows easy customization of your Macintosh to reflect the way you work
- Provides active assistance in learning new features with Apple Guide

The Power Macintosh 9500/150 computer is the top of the line in speed, performance, expandability, and upgradability, which is tremendous news for publishers, engineers, and multimedia professionals. With a 150-megahertz PowerPC 604 processor, this system provides the power you need today—and because it's processor upgradable, it protects your investment while offering room to grow.

With six industry-standard Peripheral Component Interconnect (PCI) expansion slots, this is also the most customizable, expandable Macintosh computer ever. You can find many PCI cards for a variety of uses, such as videoconferencing, video production, and high-speed networking. And if you want to use your Power Macintosh 9500/150 to run MS-DOS and Windows applications as well as software written for the Macintosh, you can install an Apple PC Compatibility Card in one of the system's PCI slots—and switch instantly between the two computing environments.

With the accelerated graphics card installed—and most configurations include one—the Power Macintosh 9500/150 supports all Apple and most third-party displays, including monochrome, color, VGA, and SVGA displays. For example, you can use your system to view up to

16.7 million colors on Apple color displays of up to 17 inches, without any additional VRAM.\*

Connecting your Power Macintosh 9500/150 computer to an Ethernet network is easy, because it includes both AAUI and 10BASE-T connectors. With an optional PC Compatibility Card, you can connect both the card and Power Macintosh to a network simultaneously.

Today, more and more computer users are discovering the wealth of information, communications resources, and opportunities offered by the Internet. The Power Macintosh 9500/150 makes it easy to get involved in this rapidly expanding community, because it comes with all of the software you need for easy Internet access.

So whether you're involved in publishing, engineering, or multimedia—or simply want the most powerful, expandable Macintosh computer ever—the Power Macintosh 9500/150 is designed to meet your needs.

\*With the addition of 2 megabytes of VRAM (for a total of 4 megabytes), the Power Macintosh 9500/150 can support millions of colors on even larger displays.

## Ordering Information

### Power Macintosh 9500/150

- Power Macintosh 9500/150 computer with 16MB or 32MB of RAM, a built-in 1.4MB Apple SuperDrive floppy disk drive, an internal 2GB hard disk drive, an internal quadruple-speed CD-ROM drive, and a PlainTalk microphone. Includes mouse; system software version 7.5.3 or later; Internet access software; complete setup, learning, and reference documentation; and limited warranty.

### PC Compatibility Card Solutions

- Order No. M4092LL/A
  - PC Compatibility Card with Pentium 100-MHz processor
- Order No. M4091LL/A
  - PC Compatibility Card with 586 100-MHz processor

### Power Macintosh GeoPort Telecom Adapter

- Order No. M3127LL/C

### Apple QuickDraw 3D Accelerator Card

- Order No. M4333LL/A

Product specifications are subject to change. Check with your Apple reseller for the most current information about product specifications and configurations.

## Technical Specifications

### Upgradable microprocessor

- PowerPC 604 microprocessor running at 150 MHz, upgradable to a higher-speed processor when available (up to 200 MHz)
- Integrated floating-point unit and 32K cache
- High-speed system bus (up to 50 MHz)

### Memory

- 16MB or 32MB of RAM, expandable to 768MB via 12 DIMM sockets
- 4MB of ROM
- 512K level 2 cache

### Disk drives

- Internal 2GB high-performance SCSI hard disk
- Internal Apple SuperDrive floppy disk drive
  - Accepts high-density 1.44MB disks and 800K disks
  - Reads, writes, and formats Macintosh, Windows, MS-DOS, OS/2, and ProDOS disks
- Internal AppleCD 600i quadruple-speed CD-ROM drive
- Two open expansion bays for additional 3.5-inch hard disks

### Interfaces

- Six PCI expansion slots compatible with PCI 2.0-compliant cards
- Two high-speed DMA serial (RS-232/RS-422) ports compatible with LocalTalk and GeoPort cables
- 10BASE-T and AUI-15 Ethernet connectors; optional PC Compatibility Cards provide multinode support for simultaneous network connections
- Internal Fast SCSI bus (up to 10MB/s)
- External SCSI bus (up to 5MB/s)
- Apple Desktop Bus (ADB) expansion port
- 16-bit stereo sound input and output ports
- DB-15 connector for monitor (on accelerated graphics card, if included)

### Graphics support

- 2MB of VRAM, expandable to 4MB
- Support for display resolutions of up to 1,280 by 1,024 pixels
- 24-bit color up to 1,152- by 870-pixel resolution
- Refresh rate of up to 75 Hz
- Third-party displays, including VGA and SVGA monitors

### GeoPort telephony\*

- 14.4-Kbit/s modem support
- V.17 fax support
- GeoPort Fax and GeoPort Telephony software included
- Speakerphone and answering-machine capability

### Clock/calendar

- Custom integrated circuit with long-life battery

### Keyboard and mouse

- Supports ADB keyboards with numeric keypads
- Comes with an ADB Mouse II

### Electrical requirements and compliance

- Line voltage: 100 to 240 V AC, RMS single phase, automatically configured
- Frequency: 50 to 60 Hz, single phase
- Power: 225 W maximum, not including display

### ADB power requirements

- Maximum current draw for all ADB devices: 500 mA (a maximum of three ADB devices is recommended)
- Mouse draws 10 mA
- Keyboard draws 25 to 80 mA (varies with keyboard used)

### Size and weight

- Height: 16.9 in. (43.0 cm)
- Width: 7.7 in. (19.6 cm)
- Depth: 15.75 in. (40.0 cm)
- Weight: 28 lb. (12.7 kg)

### Environmental requirements

- Operating temperature: 50° to 104° F (10° to 40° C)
- Storage temperature: -40° to 116° F (-40° to 47° C)
- Relative humidity: 5% to 95% noncondensing
- Maximum altitude: 10,000 ft. (3,048 m)

\* Requires GeoPort Telecom Adapter
